FAX (801) 524-4403

July 27, 2010

To: Interested Parties
From: Bronson Smart, State Conservation Engineer
NRCS
Subject: Logan Northern Canal Reconstruction Project, Cache County, Utah
Environmental Impact Statement
Invitation to Attend Public Scoping Meeting

The Natural Resources Conservation Service (NRCS), is requesting comments from you regarding the scope of an Environmental Impact Statement (EIS) on the Logan Northern Canal (LNC) Reconstruction Project in Cache County, Utah.

NRCS is preparing the EIS for proposed repair, replacement, and/or modifications to the Logan Northern Canal system. During the spring of 2009, a slope failure occurred along a hillside in south Logan, resulting in damage to the LNC and disabling the water distribution capabilities of the canal. The canal is located in an unincorporated area of Cache County and the communities of Logan, North Logan, and Hyde Park, Utah. NRCS is assisting the sponsoring local organization, Cache County, through the Emergency Watershed Protection (EWP) Program.

The public scoping meeting will be held on:
Wednesday, August 11, 2010
Bridgerland Applied Technology College
1301 North 600 West, South Entrance
Logan, Utah
5:30 p.m. to 7:30 p.m.

The public is encouraged to attend a brief project presentation at either 5:30 p.m. or 6:30 p.m. A question and answer session will follow each presentation. In addition, available project staff will address questions one-on-one throughout the evening.

We request written comments no later than Tuesday, Aug. 31, 2010. Please mail comments to:

Sue Lee
HDR Engineering
3949 South 700 East, Suite 500
Salt Lake City, UT 84107
801-743-7811

Comments may also be sent by electronic mail to LNC-EIS@hdrinc.com. Please note the project in the subject line of either written or electronic correspondence. Basic information about the LNC-EIS is also available on the NRCS Utah Website at <http://www.ut.nrcs.usda.gov/programs/EWP/index.html>

If you have any questions about the project, please feel free to contact me at 801-524-4559 or Sue Lee at the number listed above.

**NRCS Public Scoping Meeting
Logan Northern Canal Reconstruction Project, Cache County, Utah
Environmental Impact Statement
For publication on: July 28, 2010 and August 4, 2010**

The Natural Resources Conservation Service (NRCS) invites all interested individuals and organizations, public agencies, and Native American Tribes to comment on the Logan Northern Canal Reconstruction Environmental Impact Statement (LNC-EIS). NRCS is asking for public input on the important issues that should be addressed in this EIS.

NRCS is preparing the EIS for proposed repair, replacement, and/or modifications to the Logan Northern Canal system. During the spring of 2009, a slope failure occurred along a hill side in south Logan, resulting in damage to the Logan Northern Canal and disabling the water distribution capabilities of the canal. The canal is located in an unincorporated area of Cache County and the communities of Logan, North Logan, and Hyde Park, UT. NRCS is assisting the sponsoring local organization, Cache County, through the Emergency Watershed Protection (EWP) Program.

The public scoping meeting will be held on:
Wednesday, August 11, 2010
Bridgerland Applied Technology College
1301 North 600 West, South Entrance
Logan, Utah

5:30 p.m. to 7:30 p.m.

The public is encouraged to attend a brief project presentation at either 5:30 p.m. or 6:30 p.m. A question and answer session will follow the presentation. In addition, available project staff will address questions one-on-one throughout the evening.

The EIS process will evaluate alternatives that are recommended for detailed study in previous planning-level studies completed by NRCS and based on comments identified during scoping. Those not able to attend the meeting can email comments online to LNC-EIS@hdrinc.com or mail comments to:

Alana Spendlove
Logan Northern Canal Reconstruction Project
3945 South 700 East, Suite 500
Salt Lake City, UT 84107

Comments are due by August 31, 2010.

In compliance with the Americans with Disabilities Act, individuals needing special accommodations during this meeting (including auxiliary communicative aids and services) should call Alana Spendlove at (801) 573-7669 at least 7 working days before the meeting.

Basic information about the LNC-EIS is also available on the NRCS Utah Website at <http://www.ut.nrcs.usda.gov/programs/EWP/index.html>
For additional information regarding the Logan Northern Reconstruction Project, contact Bronson Smart, State Conservation Engineer, at (801) 524-4559 or Bronson.smart@ut.usda.gov.

Description

DEPARTMENT OF AGRICULTURE Natural Resources Conservation Service Intent To Prepare an Environmental Impact Statement for the Logan Northern Canal Reconstruction project, Cache County, UT AGENCY: Natural Resources Conservation Service, USDA. ACTION: Notice of Intent to Prepare an Environmental Impact Statement. SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act, 42 U.S.C. 4321-4370d (NEPA), as implemented by the Council of Environmental Quality regulations (40 CFR Parts 1500-1508), the Natural Resources Conservation Service (NRCS) announces its intent to prepare a draft Environmental Impact Statement (EIS) for the Logan Northern Canal Reconstruction project. The purpose of this notice is to alert interested parties regarding the intent to prepare the EIS, to provide information on the nature of the proposed action and possible alternatives, and to invite public participation in the EIS process (including providing comments on the scope of the DEIS, to announce that public scoping meetings will be conducted, and to identify cooperating agency contacts). DATES: Written comments on the scope of the EIS, including the project's purpose and need, the alternatives to be considered, types of issues that should be addressed, associated research that should be considered, and the methodologies to be used in impact evaluations should be sent to NRCS on or before August 31, 2010, at the address below. See ADDRESSES below for the address to which written public comments may be sent. A public scoping meeting to accept comments on the scope of the EIS will be held on Wednesday, August 11, 2010, from 5:30 PM to 7:30 PM at the Bridgerland Applied Technology College, 1301 North 600 West, Logan, Utah. Formal presentations will be given at about 5:30 PM and 6:30 PM. The building used for the scoping meeting is accessible to persons with disabilities. Any individual who requires special assistance, such as a sign language interpreter, to participate in a scoping meeting should contact Ms. Alana Spendlove, HDR Engineering, (801) 743-7829 or LNC-EIS@HDRInc.com. Scoping materials and the Alternatives Analysis will be available at the meetings and are available on the NRCS Utah Web site (<http://www.ut.nrcs.usda.gov/>). Hard copies of the scoping materials may also be obtained from Ms. Alana Spendlove, HDR Engineering, (801) 743-7829 or LNC-EIS@HDRInc.com. An interagency scoping meeting will be held on August 11, 2010, at the NRCS Utah office, 125 South State Street, Room 4216, Salt Lake City, Utah. Representatives of Native American tribal governments and of federal, state, regional and local agencies that may have an interest in any aspect of the project will be invited to be cooperating agencies, as appropriate. ADDRESSES: Comments will be accepted at the public scoping meetings or they may be sent to Mr. Bronson Smart, State Conservation Engineer, Wallace F. Bennett Federal Building, 125 South State Street, Room 4402, Salt Lake City, Utah 84138-1100, or via e-mail at brnson.smart@ut.usda.gov. Comments should be submitted by August 31, 2010. FOR FURTHER INFORMATION CONTACT: Mr. Bronson Smart, State Conservation Engineer, Wallace F. Bennett Federal Building, 125 South State Street, Room 4402, Salt Lake City, Utah 84138-1100, or via e-mail at brnson.smart@ut.usda.gov. 602293 UPAXLP

Logan Northern Canal Reconstruction Project

Environmental Impact Statement

August 2010

History

Since the 1890's the Logan Northern Canal (LNC) has provided the citizens of Cache County with irrigation water. In the spring of 2009, a slope failure along a hillside in south Logan damaged a section of the canal and disabled the water distribution capabilities of the canal. Because the canal is part of an important water delivery system, several shareholders have been affected through non-delivery of irrigation water.

In Spring 2010 NRCS completed a preliminary engineering study to assess the situation and identify potential solutions.

On February 19, 2010, USDA announced that \$19.35 million in Emergency Watershed Protection (EWP) funds were available to help protect property along the LNC from any future event of a similar magnitude. NRCS is using this opportunity to move forward to identify the best solution.

Overview and Study Area Map

As required by federal law, NRCS is working to identify resource concerns and the potential impacts of options. The impacts and options are being evaluated under the National Environmental Policy Act (NEPA).

At this time, NRCS has not identified a final solution. NRCS Utah is pursuing and compiling all NEPA documentation that will help it identify and fully evaluate alternatives to restore water delivery to stakeholders. Once the NEPA process is completed (including public comment), a "Preferred Alternative" will be identified for final design and construction.

Process and Schedule

The focus of the NEPA process is to solicit public comments and to evaluate environmental impacts of potential solutions (including

a “No-Action” option). NRCS is preparing an EIS in accordance with the requirements of NEPA and NRCS regulations.

The graphic below presents the major steps the NRCS NEPA process will follow.

The Emergency Watershed Protection Program

The purpose of the EWP program is to undertake emergency measures to safeguard lives and property from floods, drought, and the products of erosion on any watershed whenever fire, flood, or any other natural occurrence is causing or has caused a sudden impairment of the watershed.

EWP Policy and Procedures Website

http://www.ut.nrcs.usda.gov/programs/EWP/policy_and_procedures.html

Logan Northern Canal Reconstruction Project

Environmental Impact Statement

Public Scoping Meeting

August 11, 2010

5:30 – 7:30 PM

Why Is This Project Needed?

- Spring 2009 slope failure that occurred along a hillside in south Logan resulted in damage to a section of the LNC, thus disabling the water distribution capabilities of the canal.
- Several water shareholders have been adversely affected through non-delivery of irrigation water.

What Is the Emergency Watershed Protection Program?

- The purpose of the Emergency Watershed Protection (EWP) program is *to undertake emergency measures to safeguard lives and property from floods, drought, and the products of erosion on any watershed whenever fire, flood, or any other natural occurrence is causing or has caused a sudden impairment of the watershed.*
- The program is designed for implementation of recovery measures.
- EWP Policy and Procedures are available on NRCS website (see *Fact Sheet* for web address).

Why Is NEPA Necessary?

- Any federal action (including funding and permitting) that might result in effects on the natural or built environment is subject to evaluation under the National Environmental Policy Act (NEPA).
- NEPA requires lead agencies to evaluate a reasonable range of alternatives even if they are different from what might have been presented in a previous study.
- NEPA requires NRCS to evaluate a “No-Action” alternative.

Logan Northern Canal Reconstruction EIS Possible Solutions

Study Area

LEGEND

- Option 1 (Green line)
- Option 2 (Purple line)
- Option 3 (Yellow line)
- Option 4 (Orange line)

Option Descriptions

Option 1

Divert LNC water into the existing LHPS Canal alignment, from Logan River to the mouth of the canyon. From there it would be taken parallel along US 89 to a structure at 400 North and 600 East, where it would be placed back into the existing LNC.

Option 2

Divert LNC water into the existing LHPS Canal alignment, from Logan River to Lundstrom Park. From there it would be taken under city streets to 1400 North and about 900 East, where it would be placed back into the existing LNC.

Option 3

Use the existing LNC point of diversion from Logan River and place water in a pipeline under Canyon Road to 600 East. The pipeline would travel north to the intersection of 400 North and 600 East, where it would be placed back into the existing LNC.

Option 4

Divert LNC water into the existing LHPS Canal alignment, from Logan River to about 3100 North. From there, it would be taken under city streets to 1200 East, where it would be placed back into the existing LNC, with service to 1400 North.

Environmental Impact Statement Process and Schedule

We Are Here

Notice of Intent (NOI)	Scoping	Alternatives Screening	Draft EIS	Final EIS	Record of Decision (ROD)
<p>NRCS completes a NOI to prepare an EIS and publishes the notice in the Federal Register and in a local paper; this begins the public involvement process.</p>	<p>Public, state, and federal agencies help identify subjects of concern to review in the EIS.</p> <p>The process leads to a list of key factors that will guide the EIS analysis and develop the criteria for alternatives screening.</p>	<p>All reasonable alternatives are screened to determine if they meet the project purpose and need.</p> <p>Alternatives that meet the purpose and need are carried forward for further study in the EIS.</p>	<p>A Draft EIS is released for 45-day public review and comment.</p> <p>The EIS identifies a preferred alternative based on which provides the best fit with the key factors identified during scoping and has the least environmental impact when compared with other options.</p>	<p>Comments on the Draft EIS are addressed and a Final EIS is released for a 30-day review and comment period.</p>	<p>Governmental agencies consider the EIS findings.</p> <p>NRCS decides which alternative to implement and prepares a ROD.</p>
<p>Jul 2010</p>	<p>Aug 2010</p>	<p>Oct 2010</p>	<p>Dec 2010</p>	<p>Spring 2011</p>	<p>Summer 2011</p>

What Should I Comment On?

- Purpose of and need for the project
- Important Evaluation Criteria:
 - Impacts to the natural environment
 - Impacts to the built environment
- Options to re-establish water to shareholders
- Effects of a “No-Action” Alternative

How Can I Participate?

- We are interested in your comments and suggestions to identify key subjects of concern to focus the study.
- Submit comments
 - Use comment cards and deposit them in the comment box here at the meeting
 - Visit the Court Reporter here at the meeting
 - By U.S. Mail or e-mail (see *Fact Sheet* for mailing information)
- Comments are due by **August 31, 2010**
