

# Soil Moisture Conditions by Watershed

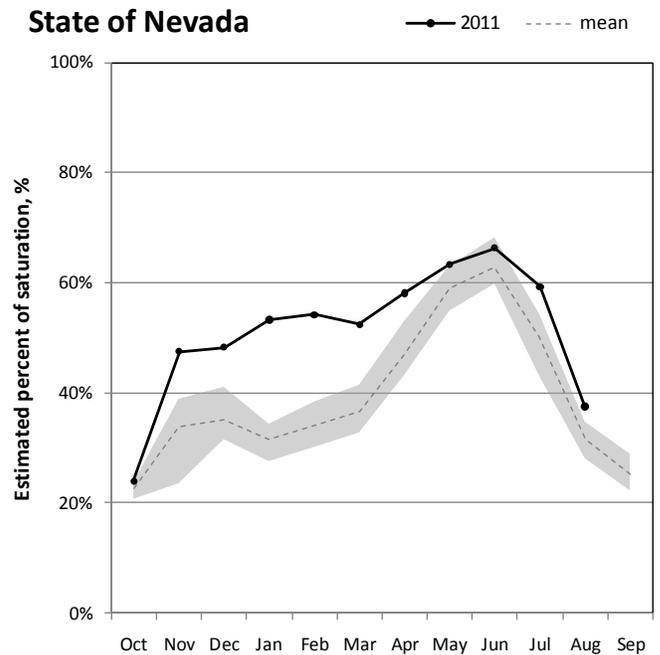

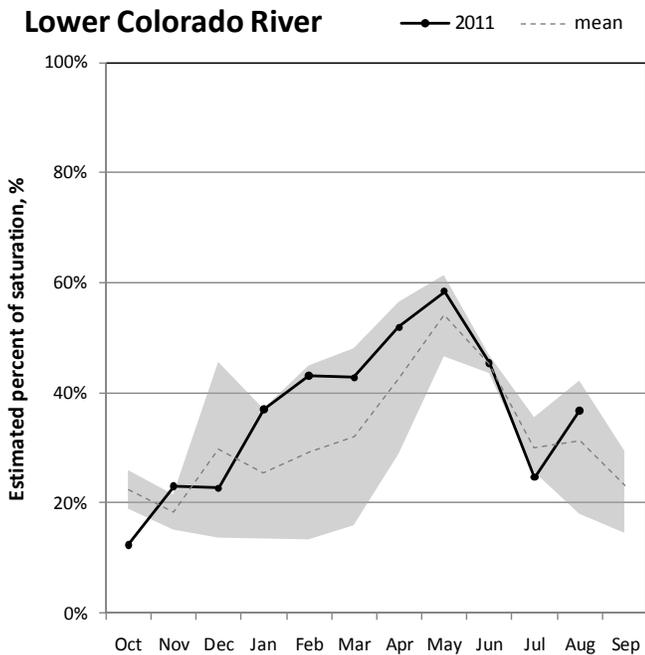

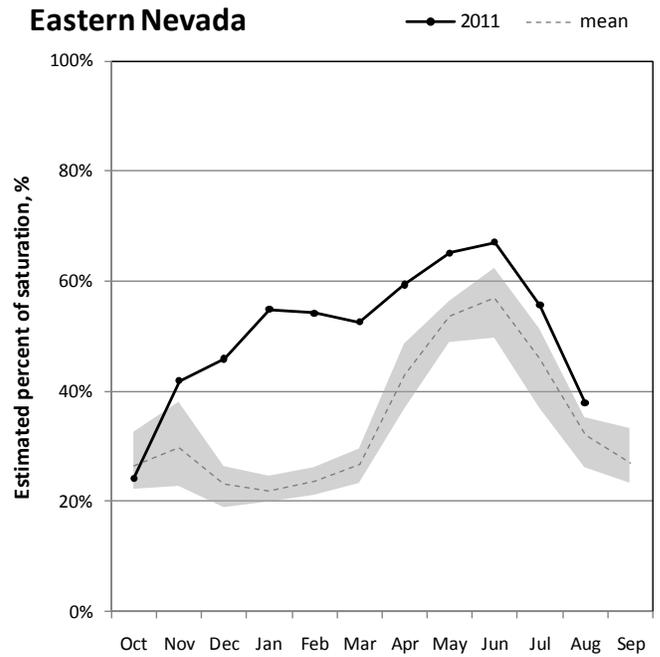

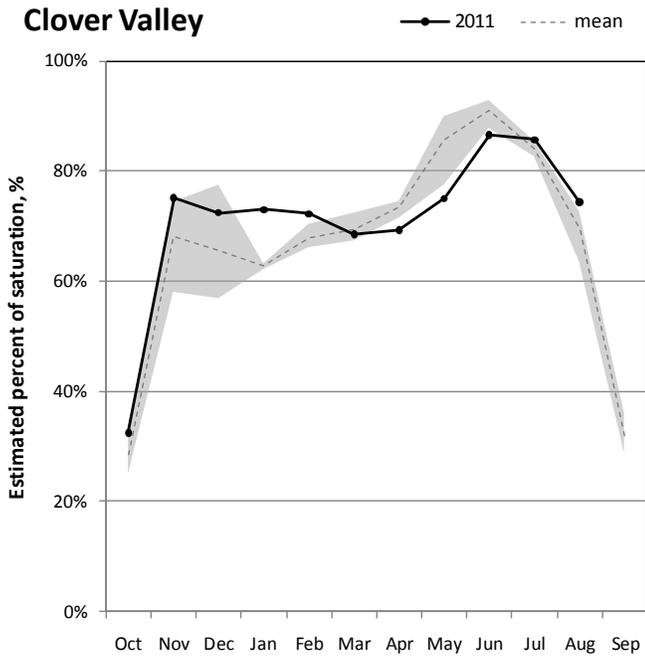

Snowpack Telemetry (SNOTEL)

Percent saturation is calculated using the weighted average of volumetric soil moisture content at 2, 8, and 20-inch depths. Saturation is estimated as 40% volumetric water content. The gray area represents the range in saturation values since October 2007. Number of SNOTEL sites in the Snake River is 3, Owyhee is 6, Upper Humboldt is 5, and Lower Humboldt is 5.

# Soil Moisture Conditions by Watershed

## Snowpack Telemetry (SNOTEL)

Percent saturation is calculated using the weighted average of volumetric soil moisture content at 2, 8, and 20-inch depths. Saturation is estimated as 40% volumetric water content. The gray area represents the range in saturation values since October 2007. Number of SNOTEL sites in the Clover Valley is 1, Eastern Nevada is 4, and Lower Colorado is 3.
